PROFILE

Product engineer with 8+ years of experience across financial products, enterprise platforms, and applied AI. I move between product framing, stakeholder alignment, architecture, and hands-on full stack delivery - especially where an uncertain idea needs to become a usable, measurable product.

EXPERIENCE

Senior Full Stack Engineer

viable | Products & Innovation

Jul 2022 - present · Vienna

- Led architecture and delivery of a grounded AI assistant across React Native and FastAPI, including streamed voice, interruption, QA, and staged releases.
- Helped shape and deliver an internal AI workspace from stakeholder needs through authentication, file processing, and rich-text editing; a follow-up phase was commissioned.
- Designed and built a white-label lending platform from patterns across 3-4 client journeys; one bank used it for several years and generated several thousand leads.
- Mentored two intermediate developers through onboarding, project challenges, conflict resolution, and career development.
- Organized and prepared multiple company-internal hackathons and other team-building activities which led to an increase in employee satisfaction

Senior Frontend Engineer

alm engineering

Nov 2021 - Jun 2022 · Munich

- Overhauled the React frontend wizard of a robo-advisor for a German private bank, refactoring complex code into a maintainable structure.
- Extended the wizard with new steps, interactive components, and animations.

Frontend Developer

Virtual Identity

Mar 2020 - Oct 2021 · Freiburg

- Built reusable CMS-to-component adapters for enterprise websites; a recursive page-tree middleware became a foundation for later projects.
- Shipped the first version of an end-to-end housing-loan application that remained in active use and development through 2024.
- Built a React investment MVP from the ground up, integrated it with an external API, and packaged it for web and native mobile with Ionic Capacitor.
